About me page

About Me

It's quite a long journey to get me here in the IT Bootcamp. Firstly, a little of my background. I enjoyed playing musical instruments and this has led me to come to Australia to study music further then followed by both study and work in business and health sectors such as pharmacy and dental sector. However, interestingly I also ended up working in the finance sector before deciding to study IT.

I have started studying programming back in July 2021 at TAFF, but despite that, it was quite tough for me as a beginner and there was not enough support system while learning to code.

Luckily, a new friend recommended me Coder Academy's Bootcamp. My plan is to delve into IT for the next decades if possible, starting with web development and once I gained some work experience I'd like to learn further and hopefully be able to specialise in a higher skill within the IT industry.

My current skills: HTML, CSS, Javascript. Skills to develop: Ruby, Ruby on Rails, MongoDB
